Professional Summary

Mobile and Web Full Stack Developer. Looking to work remote in mobile projects using hybrid solutions like IONIC or REACT NATIVE. I can also work in Back-end (JAVA/Node.JS), but it is not my main interest. Always open to learn and research new technologies, code and design patterns as the need arise.

Work Experience

November 2017 – Until Now
1App Company (until december 2019).
Clube Delivery (former 1App client who I started working directly)
Working with REACT NATIVE/JS, REDUX, JAVA(Android), Node.js, SQL(Postgress), MongoDB, GIT and database modeling.
Working remote.

October 2017 - December 2017
Start up Menyu Project.
Working with IONIC 3, JAVA, HTML/CSS/JavaScript, SQL(MY SQL), GIT, TOMCAT and database modeling.
Working at home.

July 2016 - August 2017
Start up TragoAqui Project.
Working with IONIC 1, JAVA, HTML/CSS/JavaScript, JQUERY, SQL(MY SQL), GIT, TOMCAT and database modeling.
In addition to the development of the system, I worked on the organization of the project and the business in general with 2 other partners.
Also during this period there was some contact with UNITY 3D (C#) and PHP (3~4 months).
Working at home.

August 2010 - December 2015
Internship and full-time job in the company Virtuallis. Working with HTML / CSS / JavaScript, JQUERY, SQL (Postgress), JAVA, TOMCAT Ireport, database modeling. Focused on ERP development.

Education

January 2008 - July 2016

Bachelor Degree of Computer Science, Universidade de Santa Cruz do Sul
